DETAILED ACTION

Drawings

The elected species (Fig. 22b) does not show "the flattened bulbous tails embody a continuous surface ^{that} ~~the~~ has a second width greater than the first width", the feature as claimed must be shown in the drawings or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims are rejected under 35 U.S.C. 102(e) as being anticipated by EDOGA (5,746,766).

As to claims 16-18 and 23, EDOGA (Fig. 16) discloses a prosthesis/stent 605 having a plurality of cells defined by struts having a first width, flattened bulbous tails 609/611 locate at the top and bottom of the cells. Flattened bulbous tails 609/611 do not embody a continuous surface that has a second width greater than the first width. It would have been an obvious matter of design choice to modify the width of the flattened

bulbous tails 609/611 greater than the first width of the struts, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

As to claim 19, the flattened bulbous tails 609/611 in Fig. 16 are contouring into the body of the prosthesis 605 as shown in Fig. 16 copied and shown below:

As to claim 20, in comparison to Fig. 22B, 22C and specification lines 5-15 of this application, the adjacent flattened bulbous tails 609/611 of the EDOGA prosthesis/stent 605 are staggered longitudinally as well.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
